PROFESSIONAL EXPERIENCE

Front-End Developer at NTSI

11/2022 - 09/2023

Contributed to the design and development of a system for a driving safety courses company that wanted to showcase its products.

- Enhanced the main React application, improving performance, resolving legacy bugs, and implementing new features.
- Solved the application's UI/UX issues by implementing a design system helped by the Material UI components library.
- Worked side-to-side with the customer to develop an efficient sales funnel where they could guide their customers through their products and end with contacting their sales team.
- Additionally, played a key role in developing an admin panel platform to manage the data displayed in the primary application.

PERSONAL PROJECTS

Front-End Developer at Frenos Express Mario's

In charge of the design and development of the main website for the company.

- Developed and tested web services with RESTful API.
- Developed and tested web user interfaces with React and other Javascript frameworks.
- Utilize version control systems such as git to manage projects.
